Pigment Violet 19 - Quinacridone Pigment

Pigment Violet 19 is an excellent quinacridone organic pigment with high purity and color strength. Depending on the crystal form, it can be classified into β and γ forms. The β crystal form affords a reddish violet shade, while the γ crystal form provides a bluish red shade that is much yellower than β crystal form.

Pigment Violet 19 exhibits excellent heat resistance, light and weather fastness. Its solvent resistance and migration also far exceed those of ordinary organic pigments. P.V.19 is widely used in coatings, plastics and printing inks.

Pigment Violet 19 complies with the relevant requirements of the US FDA and the EU REACH regulations.
